DataQualityReportTemplate

Data Source	DataQualityIssue	Severity	ResolutionPlan
Dataset (Restaurant reviewsand metadata)	Missingvaluesinfieldslike restaurantname,location,or ratings	Moderate	Performdata imputationusing techniqueslike mean/modefor numericvaluesand mostfrequent valueforcategorical data. Alternatively, removerowswith critical missing fields.
Dataset (User	Duplicateuserreviewentries	Low	Removeduplicate records using drop_duplicates() inpandasorSQL

reviews) Dataset (Timestamp field)	Inconsistent orincorrect timestampformat	Moderate	DISTINCTqueries. Use datetime parsinglibraries (e.g., pandas.to_datetime)tostandardize alldate/timefields.

Dataset (Restaurant metadata)	Inconsistent formats(e.g., locationwrittenindifferentways like "NY", "New York")	Moderate	Applydata standardization techniques,using stringfunctionsor regex patterns to unify the format.
Dataset (User preferences)	Sparsedataorinsufficientuser history	High	Implementfallback strategiessuchas popularity-basedor content-based recommendations when user data is lacking.
